# Practice

Mary Norris April 7, 2019

#### R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

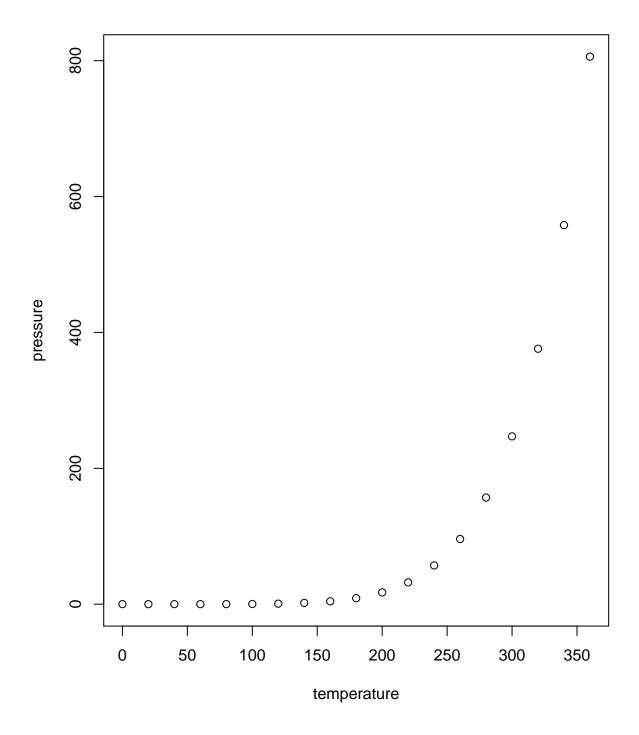

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

#### summary(cars)

```
##
        speed
                          dist
##
           : 4.0
                            : 2.00
    Min.
                    Min.
##
    1st Qu.:12.0
                    1st Qu.: 26.00
##
    Median:15.0
                    Median : 36.00
##
            :15.4
                            : 42.98
    Mean
                    Mean
##
    3rd Qu.:19.0
                    3rd Qu.: 56.00
    Max.
            :25.0
                    Max.
                            :120.00
```

### **Including Plots**

You can also embed plots, for example:

Note that the  $\mbox{echo} = \mbox{FALSE}$  parameter was added to the code chunk to prevent printing of the R code that generated the plot.

# Heading

### Subheading

#### Subsubheading

 $\operatorname{text}$ 

- Things to do in Toronto
- $\bullet~$  Go to the market
  - Find a place to eat
- Walk along watert

```
a \leftarrow c(2, 4, 6, 8)

b \leftarrow a*4

add \leftarrow a + b
```

This is how to paste my output a into my b document which is 10, 20, 30, 40.
